Sharik Anwar Zahir Hussain

Systems & AI Engineer

zsharikanwar@gmail.com +49 17645971872 Am Schwarzenberg 4, Würzburg

zahirhussain anwar-prog Portfolio

SUMMARY

Systems and AI engineer with a Master's degree in Artificial Intelligence from Technische Hochschule Würzburg-Schweinfurt. Experienced in building practical automation workflows, integrating AI tools, and developing backend services for real-world applications. Skilled in Python, C++, and API integration, with hands-on experience in chatbot systems and process automation. Fluent in English and advancing German proficiency toward B2 level.

PROFESSIONAL EXPERIENCE

Reborse Startup Jun 2025 – Present | Würzburg

AI Engineer

- Developed backend services and automation workflows to support platform functionality and improve operational efficiency.
- Built and integrated AI chatbot solutions to automate user interactions and streamline onboarding processes.
- Tested and improved AI-based features in practical environments, focusing on usability, reliability, and consistent execution.

Technische Hochschule Würzburg Schweinfurt Dec 2025 – Apr 2026 | Würzburg

Research Assistant – AI Systems Integration (Part-time)

- Developed and integrated AI-based automation workflows within web applications, focusing on practical system usage.
- Built REST APIs and automation processes for calendar systems using Node.js, ensuring structured and reliable execution.
- Supported deployment and integration tasks, including HTTPS configuration and system setup for stable workflows.

SKILLS

Programming - Proficient
Python, C++, SQL, NumPy, Pandas

Automation & Systems - Competent
REST APIs, Backend Development, Git, Docker, API Integration

Actively Learning
Cloud-based ML workflows on AWS

AI & Machine Learning - Proficient
LLMs, AI Workflows, Neural Networks, Reinforcement Learning, Predictive Modeling

LANGUAGES

German	English	Tamil
B2 (in progress)	C2	Native

PROJECTS

BewerbAI : AI-Powered Job Application Assistant Jan 2026 – Mar 2026

- Built a full-stack application using AI tools to automate job description analysis and generate tailored CVs and cover letters.
- Implemented PDF parsing, bilingual workflows, and modular automation pipelines for structured user interaction.
- Deployed the system with secure backend API handling, ensuring reliable and consistent automation processes.

AI-Based Heat Demand Forecasting (Master's Thesis) Apr 2025 – Oct 2025

- Developed machine learning models for prediction tasks using structured datasets and evaluated their performance.
- Built data processing pipelines to ensure consistent data handling and reliable model evaluation.
- Explored reinforcement learning methods for optimization in automated decision-making scenarios.

Reinforcement Learning Approaches to Blackjack Apr 2024 – Jul 2024

- Implemented a Q-learning agent for sequential decision-making in a simulated environment.
- Evaluated performance through repeated simulations and comparison with baseline strategies.

3D Object Detection in Manufacturing Environments May 2023 – Feb 2024

- Developed a CNN-based inspection system using real and synthetic image data.
- Applied transfer learning (VGG ImageNet) to improve robustness and generalization.

PUBLICATIONS

Automated Sugarcane Disease Detection Using Faster RCNN with an Android Application Apr 2022

IEEE

Developed a Faster R-CNN model for sugarcane disease detection using ~1,500 labeled images and deployed it in an Android app for real-time inference, achieving reliable detection on field data.

EDUCATION

Master's in Artificial Intelligence Mar 2023 – Jan 2026 | Würzburg

Technical University of Applied Sciences Würzburg-Schweinfurt (THWS)

Bachelor's in Computer Science and Engineering May 2018 – Apr 2022 | India

Kalasalingam University
